Approved For Release 1999/07/19 : CIA-RDP82-00803R000400120036-4

Office of the Chief Signal Officer  
Washington, D. C.

17 December 1946

SIGCC-14

Communication Facilities between the Zone of Interior and  
Overseas Areas

Director  
Central Intelligence Group  
Room 2172, New War Department Building

1. The following information relative to the capability of the  
Army Command and Administrative Network facilities for handling Central  
Intelligence Group traffic is furnished in answer to your recent request.

a. From Zone of Interior to Europe.

No decrease in capability is anticipated. An increase,  
25,000 word groups daily can be absorbed for an indefinite period.

b. From Europe to Zone of Interior.

An additional load of approximately 25,000 word groups  
daily can be presently handled, but previous commitments for War Depart-  
ment traffic and an increase in higher priority messages indicate all  
Central Intelligence Group traffic must be discontinued in early spring 1947.

c. From Zone of Interior to Pacific.

Based on present traffic levels, no curtailment in Central  
Intelligence Group traffic is anticipated in the foreseeable future.

d. From Pacific to Zone of Interior.

Based on present traffic levels, no curtailment in Central  
Intelligence Group traffic is anticipated in the foreseeable future.

FOR THE CHIEF SIGNAL OFFICER:

/s/ W. O. REEDER  
Brigadier General, Signal Corps  
Acting Asst Chief Signal Officer
